2300 Old Spanish Trail
Houston, TX 77054

Education

2002-2006 B.Sc., Computer Science, Bucknell University, Lewisburg, PA

Experience

Black Beard Labs (formerly Veteran Studio), Waynesboro, VA

Developer / Consultant - 2017-2018

Worked closely with the founder in setting up the company. Assisted in selecting and configuring the infrastructure, promoting the business, and hiring employees.

Innovative Refrigeration Systems, Lyndhurst, VA

Web Developer - 2016-2017

Developed a REST service managing users, permissions, authorization, and authentication. Written in Laravel Lumen slim framework on a LAMP stack.

Developed business reports incorporating data from both MySQL application databases and a Microsoft SQL database hosting proprietary data.

As the most experienced member of the team, I worked hard to teach newer developers best practices in both technical and career skills.

Pacific Crest Trail, CA-OR-WA, USA

Through Hiker - 2015

Spent six months hiking the Pacific Crest Trail from the Mexican border near Campo, CA to the Canadian border in the wilderness of northern Washington.

MidwayUSA, Inc., Columbia, MO

Database Administrator - 2013-2015

Researched and executed a company-wide upgrade from SQL Server 2010 to SQL Server 2012. Determined requirements for and set up new servers and SQL Server installations. Migrated existing databases to new servers.

Researched and implemented a solution using Availability Groups to greatly increase database performance, availability, and reliability.

Updated legacy SQL jobs to work properly with the redundant databases required for Availability Groups.

Worked directly with Application Developers to collect and analyze business requirements, design data structures, and write high performing, reliable, and accurate stored procedures which the Application Developers then utilized from their applications.

Application Developer - 2010-2013

Created and maintained backend services to provide data for frontend developers.

Mapped the existing process and redesigned the entire credit card processing business process, replacing a system that has been in place for over a decade with a solution based on enabling reliable, durable processing of requests at a higher capacity.

Zeta-Meter, Inc., Staunton, VA

Embedded Engineer - 2006-2010

Designed and implemented a Windows based data acquisition and analysis program in C#.

Designed the electrical circuit and authored software for a scientific instrument which uses a Freescale HCS12 microcontroller.

Skills

Multi-paradigm Polyglot

I enjoy learning new languages and have experience with many. I have professional experience with:

- C# .NET
- SQL: Microsoft T-SQL and MySQL
- PHP
- Assembly, C, and C++
- JavaScript
- CSS
- Powershell, Bash

Learning many languages has also given me experience with many major programming paradigms including object oriented, functional, procedural, and declarative. I also have experience implementing my own small domain specific languages including lexers, parsers, and compilers.

Specific Solutions and Software Packages

- Laravel (including Lumen), CodeIgniter Frameworks on Linux, Apache, MySQL, PHP stack
- Kubernetes, CoreOS, Terraform, Typhoon, DigitalOcean, Docker, Vagrant

- Epicor9 (Enterprise Resource Planning)
- Microsoft SQL server
 - General Administration
 - T-SQL Language (Stored Procedures, Views, etc.)
 - SQL Server Reporting Services (SSRS)
 - SQL Server Integration Services (SSIS)
- Splunk
- Microsoft Silverlight, WPF, MVC, WCF Services on .NET, Primarily C#
- Microsoft DirectX (2D and 3D)
- Microsoft Visual C++
- FreeRTOS embedded real time operating system
- Freescale (formerly Motorola) HC08 and HCS12, Microchip PIC Microcontrollers in C, PicBasic Pro, and Assembly
